Moving forward

In globalization is progressing be nonstop in the knowledge and technology. That make the people have the facility in your life very much. In everyone's life be related to the moving forward with science and technology every your breath. Especially people in the city has to relate tie yourself with a communications tool and can't to avoid it.

The change into information society and technology. In every life have the news very much. The communication is spread the news to around that make everyone to know the news all together but, it depends on who will open before or after. The news was spread very fast like the virus in the world. At society's today is limitless the news in the country was spread quickly and easily to around the world. And the world has the personality increase requirement in factor was more so in the way of life have to more than cause of the requirement for factor was increased. In lifestyle will have the shadow around your body. The people have to complete to create the technology for meet the demand and for the leadership of economy.

We take the technology to use we accepts in development to moving forward very much. Also have some of people that use the technology to the bad side and use to exploit it to them self which sometimes make the problem to another people or the institute. We are should consider the good side and bad side about how to use the technology used before. Maybe some of technology will hurt us both directly and indirectly. That we don't know it. From past to present has moving forward of the technology. It make technology Continuous development and all the time technology have moving forward continuous that make the society have change continue to develop than make the people that use technology have to moving forward keep up but, we have to be conscious to use technology.

The moving of technology that was the same the moving forward of the people but, the technology will fast or slow it depends on people. Cause of the people was make the technology come up. Something in technology is faster than

person because of the people thing that technology was do better than human. It true the technology isn't do better but, the technology was do can't stop it. That make the why the technology was faster than person. And some of people was lazy that will make the people slow than technology.

In the life everyone use technology to moving forward in every day. Cause of the people use the technology to research an information and use to do work. Technology teach every people to the good ways and bad ways. The good way that is good but, it can come back to hurt you sooner or later. From the bad way certainly that came back to hurt you that is the problem was biggest or smallest. And in 21 century have the plan to make the technology many so it make the people started lazy more than before.

In my life moving forward is important cause of it make my life to the good way and I will have the better life. My father ones said moving forward will teach everything be ourselves and if your should the good way it will make your life better. And I choose to study let us learn more. Moving forward is not allow us to learn what's ahead, but the way we walk is what drives us forward. It's up to you to start moving forward. If you was start it fast you will to find success faster than the some people that cannot think.

However if you go moving forward alone you will disappointed and not ready to move forward. In my opinion I want to have friends stay by your side and moving together. That is just a dream. On the against having a friend may make one person hindrance one another. But some people thing have friend we may have someone to support us. When we are discouraged, we still have people pulling us up and still help us not to fall together again.

In addition have good friends. Friendship is more difficult because some friends do not always hope for good with us. We will have to rely on ourselves. As well as traveling their way but, we found people on the way, but we did not take it. It is more difficult if friendship with work cannot go together it may cause us to lose it. Everything it's all up to you. How do you move forward, how does it affect what matters to you? I believe having friend is the good to moving forward when you succeed, you will have tired people coming along with you and succeed along with you. That's your real friend and ready to go everywhere with you.
